SECTION X - ADDITIONAL INFORMATION

In accordance with the Code of Federal Regulations, Title 29, Chapter XVII, Part 1910, Subpart Z, Section 1910.1200, this material is considered to be an article because the product 1) is formed to a specific shape or design during manufacturing; 2) has an end use function dependent in whole upon its shape or design during end use; and 3) does not release or otherwise result in exposure to a hazardous chemical under normal conditions of use and, as such, is exempt from the OSHA Hazard Communication Standard requirements for toxic and hazardous substances. Although Garlock Rubber Technologies has no reason to believe that a hazard exists once ingredients are added and cured into a rubber matrix, we recommend that precautions be taken. If needed, please contact us for additional information if you plan to grind or otherwise treat this product such that the product would be chemically or physically altered in such manner as to release its constituent chemicals.
The following ingredients of this mixture are reportable as listed under Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA) and 40 CFR 372.
